Hydrobiologia
The International Journal on Limnology and Marine Sciences

Contents

Volume 414

SPECIAL ISSUE

European Colloquium on Marine Science
Guest Editor: J.-C. Dauvin

European Marine Science and Technology vii
Objectives and Topics ..... ix–x
List of participants ..... xi–xii

Modeling of a tidal bottom boundary layer with suspended sediment
by G. Chapalain, L. Thais & H. Smaoui 1–12
No feeding on *Phaeocystis* sp. as solitary cells (post-bloom period) by the copepod *Temora longicornis* in the coastal waters of the English Channel
by Elsa Breton, Benoît Sautour & Jean-Michel Brylinski 13–23
Spatio-temporal variability in the gonad growth of *Ophiothrix fragilis* (Echinodermata: ophiuroidea) in the English Channel and estimation of carbon and nitrogen outputs towards the pelagic system
by A. Lefebvre, D. Davoult, F. Gentil & M.A. Janquin 25–34

Algal Modelling: Processes and Management
Guest Editor: A. Howard

Preface
by A. Howard 35–36
Exploring the potential of the PROTECH model to investigate phytoplankton community theory
by J.A. Elliott, C.S. Reynolds, A.E. Irish & P. Tett 37–43
Sensitivity analysis of PROTECH, a new approach in phytoplankton modelling
by J.A. Elliott, A.E. Irish, C.S. Reynolds & P. Tett 45–51
Implementation and sensitivity analysis of a model of cyanobacterial movement and growth
by Mark P. Easthope & Alan Howard 53–58

Modelling phytoplankton dynamics of the eutrophic Lake Võrtsjärv, Estonia
by T. Frisk, Ä. Bilaletdin, H. Kaipainen, O. Malve & M. Möls 59–69
Examination of the phytoplankton of Rostherne Mere using a simulation mathematical model
by V. Krivtsov, D. Sigee, J. Corliss & E. Bellinger 71–76
Modelling of elemental associations in *Anabaena*
by V. Krivtsov, E.G. Bellinger & D.C. Sigee 77–83

Author index 85
